CMP-142 Object Oriented Programming
BS Fall 2014
BQuiz 02 Afternoon

RollNo:

Issue Date: 18-Mar-2014
Time: 5 min
Marks: 1

Objective:

- The purpose of this quiz is to focus on the very basic fundamental concepts learned so far in previous lectures.

Question:

Suppose that age is an int variable and name is a char array of size 100. What are the values of age and name after the following input statements execute?
Note: In this quiz: you can show/represent space as * symbol.

```
cin >> age;
cin.getline(name,sizeof(name));
if the input is:
```

A. 23 Lance Grant

Value in age =

Value in name =

B. 23
Lance Grant

Value in age =

Value in name =
