CMP-142 Object Oriented Programming
BS Fall 2014
BQuiz 02 Afternoon

RollNo:

Issue Date: 18-Mar-2014
Time: 5 min
Marks: 1

Objective:

- The purpose of this quiz is to focus on the very basic fundamental concepts learned so far in previous lectures.

Question:

Suppose that age is an int variable and name is a char array of size 100. What are the values of age and name after the following input statements execute?

```
cin >> age;
cin.getline(name,sizeof(name));
```

if the input is:
  A. 23 Lance Grant
  B. 23
     Lance Grant

In case of A part
  age will be = 23
  name will be = *Lance Grant　　　　　　　　　　**where * means a space character**

In case of B part
  age will be = 23
  name = '\n'　　　　　　　　　　　　　　　　**where \n will be at name[0] location**
